Diabetic Liver Disease

Guest Editor:

Dr. Yoshio Sumida

1. Department of Hepatology and Pancreatology, Aichi Medical University of Medicine, Nagakute, Aichi, Japan
2. Japan Strategic Medical Administration Research Center (J-SMARC), Nagoya, Aichi, Japan

Deadline for manuscript submissions:

closed (20 March 2021)

Message from the Guest Editor

Nonalcoholic fatty liver disease (NAFLD) which is the most prevalent chronic liver disease, is associated with type 2 diabetes (T2D). Nonalcoholic steatohepatitis (NASH), a severe form of NAFLD, can progress to cirrhosis, hepatocellular carcinoma (HCC), and hepatic failure. Liver-related mortality is the 3rd leading cause in T2D patients. NASH can be called “diabetic liver disease (DLD)”. Accumulating evidence shows that PNPLA3 SNP is associated with fibrosis progression or HCC development. This Special Issue will include papers investigating the pathological mechanisms of T2DM and liver diseases such as NASH, and diagnostics using new biomarkers. Furthermore, experimental in vitro and in vivo studies and clinical studies examining potential new approaches to attenuate DLD are welcome. This Special Issue welcomes original research and review papers.

Keywords:

- Nonalcoholic fatty liver disease
- Hepatocellular carcinoma
- Nonalcoholic steatohepatitis
- Type 2 diabetes
- Hepatic fibrosis
- Liver cirrhosis
- PNPLA3

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of
Odontostomatologic and
Specialized Clinical Sciences,
Sez-Biochimica, Faculty of
Medicine, Università Politecnica
delle Marche, Via Ranieri 65,
60100 Ancona, Italy

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
