closed (30 January 2023)

Message from the Guest Editor

Dear Colleagues,

Psoriasis (PSO) and atopic dermatitis (AD) are common skin diseases by which patients' QOL has been severely affected. Despite recent progress in the development of novel therapeutics, there have not been perfect therapeutic guidelines to cover all patients. This is due to the variability and diversity of both diseases, as PSO and AD are multifactorial diseases. In this Special Issue, I would like to summarize genetics, immunology, environmental factors, and co-morbidities on both diseases. I hope that this Special Issue will bring insight into diversity in pathophysiology, and the innovation of novel therapeutic modalities of PSO and AD.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
