Deadline for manuscript submissions: closed (31 May 2022)

Message from the Guest Editor

Dear Colleagues,

Components of the extracellular matrix (ECM), such as collagen, fibronectin, laminin, and proteoglycan, maintain cardiac structure and function by forming a complicated three-dimensional network. Cell-ECM interaction is also important for regulating the functions of cardiomyocytes and non-cardiomyocytes. An imbalance between the production and degradation of the ECM during the development and progression of heart disease is associated with pathological cardiac remodeling, including hypertrophy and fibrosis. Recently, it has been reported that matricellular proteins, a family of non-structural ECM matricryptins/matrikines, proteins. and bioactive fragments of ECM proteins, are involved in cardiac remodeling. In this Special Issue, we expect to gather novel knowledge that will lead to the discovery of drugs targeting the ECM and its fragments for heart disease.

Specialsue

Dr. Muneyoshi Okada *Guest Editor*

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
