Message from the Guest Editors

Dear Colleagues,

This Special Issue of the *International Journal of Molecular Science* shall encompass topics regarding the evolution of regulation of gene expression during eukaryotic embryonic development. Topics may include but not be limited to the evolution of differential gene expression at the level of transcription, mRNA processing, translation, and/or subcellular localization of protein expression. Further, data on how mutations at the level of the DNA have led to divergent gene regulation mechanisms, genetic regulatory networks, and/or the development of variable morphological structures between evolutionarily divergent lineages are acceptable. Research manuscripts and comprehensive reviews adhering to the journal's aims will be accepted.

Dr. Adam Davis

Dr. Jo Qian

Dr. Ghulam Hasnain

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
