### Message from the Guest Editor

Dear Colleagues,

In parallel with the discovery of hypothalamic growth hormone-releasing hormone (GHRH), a series of synthetic peptides, called GH-releasing peptides (GHRP), were also found to release GH from the pituitary gland. The receptors and signaling systems for GHRH and GHRP are different, but cross-talk with each other to regulate GH secretion. Both GHRH and GHRP receptors have been identified as G-protein coupled receptors (GPCR) in pituitary GH secreting somatotrophs. Ghrelin was discovered in searching for endogenous GHRP or GH secretagogues (GHS) from stomach endocrine cells. The ghrelin receptor or GHS receptor (GHSR) distributes widely in almost all tissues, indicating multiple functions for this hormone. This Special Issue would like to bring up the most recent discoveries in ghrelin action on different systems and aims to summarize possible physiological, pathophysiological and therapeutic roles of ghrelin and synthetic GHS. Potential research directions will also be discussed to provide possible leads for future research of ghrelin and its analogues.

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
