Update on Basic and Molecular Research in Inflammatory Bowel Disease

Guest Editors:

Dr. Alfredo Papa
Fondazione Policlinico Gemelli, IRCCS, Catholic University of Rome, Area Medicina Interna, Gastroenterologia ed Oncologia Medica, 00168 Rome, Italy
alfredo.papa@unicatt.it

Dr. Loris Riccardo Lopetuso
Internal Medicine and Gastroenterology Department, IRCCS Fondazione Policlinico Gemelli, Catholic University of Rome, 00168 Rome, Italy
lopetusoloris@libero.it

Deadline for manuscript submissions:
15 January 2020

Message from the Guest Editors

In the recent years, many advances in the pathogenesis of inflammatory bowel disease (IBD), including Ulcerative colitis and Crohn’s disease, have emerged with a substantial impact on daily clinical practice. These new findings allowed the introduction of new molecular markers and innovative drugs useful for an innovative clinical approach to IBD. We propose to your attention a special issue of IJMS including Reviews and Research Articles regarding recent advances in the field of basic and molecular research with translational applications in IBD.

The establishment of new goals in the management of IBD and the continuation in the understanding of the IBD pathogenic mechanisms have introduced new concepts in the area of intestinal fibrogenesis, small oral therapeutic molecules, gut microbiota, molecular markers of intestinal healing, molecular predictive markers of response to therapy.

In this Special Issue, we will welcome your contributions in the form of original research and review articles facing each side of basic and molecular research in IBD.
Message from the Editorial Board

The International Journal of Molecular Sciences (IJMS, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. IJMS publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in IJMS and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High visibility: indexed by the Science Citation Index Expanded (Web of Science), MEDLINE (PubMed), Scopus and other databases.
Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 15.7 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2019).
