submissions:

closed (20 June 2025)

Message from the Guest Editors

Dear Colleagues,

Brain metastases are the pathological outcome of uncontrolled tumor growth. Brain metastasis is defined as originating in brain tissue itself or originating in peripheral organs, including breast, lung, colon, and others. Patients with brain metastasis may have congenital dysfunction and various neuropathological symptoms, resulting in poor quality of life and shorter life expectancy. Metastatic brain cascade is complex and requires crosstalk between many processes, including regulation of the brain microenvironment, blood–brain barrier (BBB), high-energy consumption, nutrition demands, and regulation of the cytoskeletal system. These distinctive characteristics of tumors contribute to their unique physiological status and make them difficult to manage and treat. Research in this field is crucial in determining the factors that control development and behavior of brain metastasis and tissue invasion. Our mutual goal as molecular oncologists is to find new and more effective treatment to improve the life of those affected by this disease. This Special Issue on metastasis and invasion of the brain by cancer will explore new molecular findings on this topic.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
