

The Interaction between Cell and Virus

Guest Editor:

Prof. Dr. Masahiro Fujimuro

Department of Cell Biology,
Kyoto Pharmaceutical University,
Kyoto 607-8412, Japan

Deadline for manuscript
submissions:

closed (31 March 2023)

Message from the Guest Editor

A better understanding of the interaction between viruses and host cells could provide new insights into the process of pathogenesis, immune disruption (or activation), and tumorigenesis triggered by viruses and may provide a theoretical basis for the development of novel therapeutic interventions against infectious diseases.

For this Special Issue, original research articles, review articles and short communications are welcome. Research areas of interest include the cell–virus interaction involved in viral replication, gene expression, latent or lytic infection, viral structural protein and enzyme, virus assembly, cell signaling pathway, post-translational modification, host factor, virus immune evasion, host immune response, viral tumorigenesis or disease, antiviral medication, vaccine, animal model, and gene therapy.

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
