submissions:

**closed (15 April 2024)**

### Message from the Guest Editors

Dear Colleagues,

Insulin resistance arises when cells in fat, skeletal muscle, the heart and the liver cannot respond to insulin hormone. It has been reported that insulin resistance plays a critical risk factor for development of type 2 diabetes mellitus, cardiovascular disease and other related metabolic diseases. Development of insulin resistance is strongly associated with several important metabolic pathways such as glucose/lipid metabolism, ectopic lipid accumulation, mitochondria dysfunction, ER stress and inflammation. The aim of this Special Issues is to find and delineate new molecular targets and mechanisms which reduces a main cause of insulin resistance.

Dr. ByungYong Ahn

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
