Medical Sciences, University of  
Naples Federico II, 80131 Naples,  
Italy

Deadline for manuscript  
submissions:  
**closed (30 November 2022)**

### Message from the Guest Editors

Chronic inflammatory diseases (obesity, diabetes, inflammatory bowel diseases, autoimmune diseases, cancer and several age-related diseases) are generated by the interaction of several different factors, such as environmental, genetic and microbiota factors. Among the environmental factors that induce inflammation, nutrients play a key role as they can have pro-inflammatory or anti-inflammatory effects, directly or indirectly mediated by the intestinal microbiota.

Articles or reviews in this Special Issue will mainly focus on:

1. Obesity, diabetes, inflammatory bowel diseases, autoimmune diseases, cancer, several age-related diseases and other diseases.
2. What happens before the onset of disease in the biochemical, metabolic and pathological processes at the molecular level.
3. All steps of life from the development to ageing where low-grade inflammation can discriminate between health and disease.
4. How several different factors including diet, nutraceutical and the exclusion of environmental pollutants can interfere with low-grade inflammation and determine the onset or the progression of disease.

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
