### Message from the Guest Editors

The purpose of this Special Issue is to gather the latest information and highlight the state of the art in the progress of mitochondrial proteomics in order to highlight yet-unknown aspects, or to clarify the complex mechanisms, linked to mitochondrial dysfunction in neurodegenerative diseases.

Reviews, commentaries, and original research based on proteomics and mass spectrometry are welcome (for example, discovery, quantitative aspects, PTMs, and redox proteomics), independently or in combination with other, more classic biochemical, molecular, and cellular approaches.

Deadline for manuscript  
submissions:

**closed (30 November 2022)**

## Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
