- 2. Stem Cell Transplantation and Cellular Therapy Laboratory, Paediatric Onco-Haematology Division, Regina Margherita Children's Hospital, City of Health and Science of Turin, 10126 Torino, Italy

Deadline for manuscript submissions: **closed (30 July 2023)**

Message from the Guest Editor

Dear Colleagues,

Mesenchymal stromal/stem cells (MSCs) are excellent candidates for the development of cell-based therapies in the treatment of various conditions, with over 900 clinical trials worldwide currently using MSCs to treat, among other conditions, bone/cartilage damage, diabetes, cardiovascular diseases, immune-related disorders, and neurological disorders (www.clinicaltrials.gov).

We invite you to contribute to this Special Issue with original research articles describing recent developments in MSC-based therapy. We are particularly interested in studies that illustrate the mechanisms underlying the protective effects of MSCs and demonstrate their role in immunomodulation and tissue regeneration.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
