Message from the Guest Editors

Dear Colleagues,

We are pleased to announce a call for submissions for a Topical Collection of the *International Journal of Molecular Sciences* dedicated to the development of novel biotherapeutics in Italy, including bioactive peptides, recombinant proteins, natural and plasma-derived proteins, monoclonal antibodies, antibody fragments, DNA and RNA fragments, PNAs, other DNA/RNA surrogates, and bio-materials. A deeper understanding of the molecular, structural, functional and analytical properties of these molecules is the main requirement to progress towards their preclinical and possibly clinical testing in both academic and industrial research groups, and papers on these topics are often the seminal works in their development as valuable products. We therefore encourage the submission of research articles, reviews and commentaries on one or more of these topics by Italian research groups of all backgrounds who are actively working in this field.
