### **Message from the Guest Editors**

This Special Issue will publish original research articles as well as full reviews on the current understanding of molecular mechanisms involved in aldosterone and mineralocorticoid receptor pathophysiology. Manuscripts on the novel cellular and molecular mechanisms modulated by aldosterone and activation of the mineralocorticoid receptor and their implication at the cell, tissue and organ levels are welcome, as well as reports on the pathophysiological roles of aldosterone/MR on organ crosstalk, comorbidities and chronic disease progression leading to the potential use of aldosterone and MR antagonists. Manuscripts based on clinical studies will not be considered.

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
