Message from the Guest Editors

We invite submissions of original articles, review articles and commentaries for this Special Issue on “*NK cell subsets in health and disease: new developments*” in *International Journal of Molecular Sciences*.

This Special Issue will focus on NK cell subpopulations found in viral infections as well as other microbial contexts and tumors. The newer approaches such as single cell analysis and mass cytometry to identify NK subpopulations will be preferred. NK cell immunotherapy is an emerging cellular therapy for cancer. We also welcome research articles on novel functions of NK cells in tumors and cytokine induced memory NK and CAR NK cell-based therapies for cancer.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
