Deadline for manuscript
submissions:

30 April 2021

Message from the Guest Editor

Sodium voltage-operated ion channels (NaV) are widely represented in the peripheral nervous system (PNS), being crucial for action potential generation. Modulators of NaV are attracting interest as potential therapeutic strategies for PNS disorders. They represent a valuable strategy for neuropathic pain management, gaining attention in the post “opioid crisis” era, which was strongly felt by healthcare professionals, in particular, in the US; moreover, NaV modulators are also attracting interest as neuroprotectants against axonal damage, in particular, when the underlying mechanism is axonal hyperexcitability. This Special Issue explores the applicability and usage of NaV modulators against PNS disorders, including but not limited to mechanical, metabolic, genetic, toxic, and dysimmune neuropathy.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and many other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
