Deadline for manuscript
submissions:

closed (31 January 2022)

Message from the Guest Editor

Neuropeptides are short-chain amino acids produced by neurons and the most abundant chemical messengers in the brain. These small molecules are biologically active at very low concentration and exert a broad range of effects in the central nervous system, including regulatory functions in the endocrine and immune system.

Therefore, the purpose of this Special Issue is to shed more light into our understanding of how currently known neuropeptide systems contribute to the onset of and/or are dysregulated by pathological conditions of the endocrine and immune system. Original contributions and review articles addressing the role of neuropeptides in the onset and pathogenesis of auto-immune conditions affecting the CNS or involving HPA axis dysfunctions will also be considered.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
