Deadline for manuscript
submissions:

closed (10 July 2024)

Message from the Guest Editors

Dear Colleagues,

Soil science is an interdisciplinary science that is confronted today and for several decades with major societal, environmental, and human health issues. It has at its disposal a wide range of experimental and modeling techniques to address the issues at different scales of time and space. Its challenges concern, for example, the knowledge and control of pollution risks by contaminant molecules such as pesticides, drugs, pharmaceuticals, etc. The soil is a compartment of the ecosystem that significantly contributes to the global cycle of pollutants. In most cases, it serves as the major sink capacity and transformation reactor. The rapid progress in computer technology and in the development of computational methods in theoretical chemistry has allowed us to access to analyze complex systems such as soil and solvated contaminant systems and their interactions within biogeochemical interfaces.

In this Special Issue, we welcome contributions from all fields of computational and theoretical chemistry, including reviews and original works, demonstrating the key role of soil, as an ecosystem compartment, in the global pollutant cycle.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maurizio Battino

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
