Message from the Guest Editor

Dear Colleagues,

In the last 100 years, dentistry has broadened its scope due to the increase in research, and numerous innovations in technology and in the digital and molecular sciences. The applications of new materials and techniques can lead to significant advances in the main dental branches, such as restorative dentistry, prosthodontics, oral surgery, implantology, pediatric dentistry, orthodontics, and temporomandibular disorder patients.

In this Special Issue, we would like to focus on the most recent and significant innovations in the dental field, particularly research at a molecular research level. Authors that have conducted studies on these themes are welcome to submit original research articles, reviews and short communications.

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
