Medicine, Nanyang
Technological University, Clinical
Sciences Building, 11 Mandalay
Road, Singapore 308232,
Singapore

Deadline for manuscript
submissions:

closed (31 March 2020)

Message from the Guest Editors

According to the World Health Organization, noncommunicable diseases (NCDs) kill 41 million people each year, equivalent to more than 70% of all deaths worldwide. There is mounting evidence that a group of related transcription factors, the nuclear receptors called peroxisome proliferator-activated receptors (PPARs), are involved in some of these chronic diseases, such as obesity, diabetes, cardiovascular diseases, and cancer. PPAR activity is modulated not only by fatty acids and their derivatives, but also by drugs such as thiazolidinediones and fibrates, which has instigated an extraordinary research effort for understanding the roles of PPARs in health and disease, more particularly through metabolic regulation. This Special Issue of IJMS will cover the latest developments in the physiological functions of PPARs in all organs, including their responses to nutrition and physical activity. It will explore processes regulated by PPARs, which are implicated in cellular and whole-organism metabolism. How key roles of PPARs in healthy and diseased organisms can be modulated to maintain or improve the optimal health of individuals and populations is of foremost interest.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maurizio Battino

Odontostomatologic and
Specialized Clinical Sciences,
Sez-Biochimica, Faculty of
Medicine, Università Politecnica
delle Marche, Via Ranieri 65,
60100 Ancona, Italy

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
