Advances in the Pharmacological Treatment of Dementia

Guest Editor:

Prof. Dr. Chaur-Jong Hu
Department of Neurology, Taipei Medical University Shuang-Ho Hospital, New Taipei City 235041, Taiwan

Deadline for manuscript submissions:
closed (31 July 2023)

Message from the Guest Editor

The causes of dementia are diverse, and symptomatic or disease-modifying treatment of dementia both have unmet medical needs. Many novel treatments for dementia including small molecules, antibodies, and cell therapy are being developed. These treatments usually target the underlying pathophysiological mechanisms, such as neuroprotection, anti-neuroinflammation, toxic protein removal, neuro-regeneration, etc. This Special Issue will focus on the basic preclinical studies or clinical trials in early stages about the treatment of any kind of dementia, especially the pharmacological approaches. Both original reports and review articles are welcome. To align with the scope of this journal, exploration of the molecular mechanisms or related evidence/information are requested.

We hope to provide a condensed and comprehensive picture of advances in the treatment of dementia in this Special Issue.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
