Message from the Guest Editors

Dear Colleagues,

The aim of the Special Issue “*Porphyrin and Biomolecules: A Long-Lasting Friendship*” is to explore the more recent advances on the covalent and non-covalent interactions between porphyrins or related macrocycles and biomolecules.

This Special Issue welcomes interdisciplinary original research papers or comprehensive reviews focusing on the wide versatility of the supramolecular interactions between porphyrinoids and biomolecules for potential applications as sensors, conformational probes and in the field of nanomedicine and biotechnology. A paper highlighting the spectroscopic and chiral outcomes of building supramolecular systems or chiroptical probes will also be covered in this Issue.
