2. Professor, Department of Internal Medicine, Chung-Ang University School of Medicine, Seoul, Korea

Deadline for manuscript submissions:

**closed (31 August 2021)**

### Message from the Guest Editor

Dear Colleagues,

Despite contemporary evidence-based pharmacologic treatments and interventional strategies, clinical events derived from atherosclerotic cardiovascular disease (ASCVD) remain substantially frequent. Studies have focused on controlling the molecules and pathways related to residual CV risks. In addition, the phenotypes of residual CV risks have become more important than before, since therapeutic strategies for controlling these risks are emerging, and several pharmacologic candidates could reduce the risk of CV events. However, there are unmet needs to develop reliable clinical biomarkers (based on molecular mechanisms and pathways) for targeting the right patients with the right therapies at the right time. Therefore, this Special Issue of the *International Journal of Molecular Science* will cover various emerging targets and important aspects of residual CV risks, which may contribute to the improvement of patient care.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
