Message from the Guest Editors

Dear Colleagues,

It is my pleasure to inform you about the Special Issue "Regeneration for Spinal Disease". Spinal diseases place a significant burden on the general population. The prevalence of degenerative spinal diseases, including intervertebral disc degeneration and osteoporosis, increases with age, and the affected population may suffer from long-term disability. The most serious conditions affecting the spine include spinal cord injury due to traumatic or non-traumatic causes (e.g., cancer, infection). Despite recent advancements in the management of these spinal diseases, there is growing research interest in discovering a novel therapeutic strategy.

This Special Issue focuses on regenerative therapy for spinal diseases, including spinal cord injury, intervertebral disc degeneration, osteoporosis, and pseudarthrosis.

Deadline for manuscript
submissions:

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
