Deadline for manuscript  
submissions:

**closed (30 April 2024)**

### Message from the Guest Editor

Dear Colleagues,

MicroRNA-200c is a non-coding small molecule RNA involved in the post-transcriptional regulation of genes, thus affecting various biological functions of the organism, and has become a hot research topic in the recent years. A large number of studies have demonstrated that microRNA-200c plays an important role in the invasion and metastasis of breast cancer, pancreatic cancer, non-small cell lung cancer and etc. This Special Issue welcomes molecular studies of microRNA-200c as an oncogene or oncogene suppressor or as a potent molecular marker, and the molecular mechanisms involved in the interaction between microRNA-200c and cancer will also be welcomed. Early diagnosis and clinical prognosis are beyond the scope.

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
