### Message from the Guest Editor

Dear Colleagues,

In recent years, our knowledge of plant molecular biology has been dramatically improved by the introduction of biochemical and biophysical breakthrough techniques and the updated knowledge of plant genomics and genetics. With the aim of stimulating broad interest in plant molecular biology, the collection of papers in this special issue of *IJMS*, therefore, will present an overview of the latest fundamental discoveries in the field. For this reason, we invite scientists active in the field to provide the community with their outstanding research contributions. We welcome all types of submissions, including original research, reviews, perspectives, and opinion articles in this field, including (but not limited to) research covering.
