Message from the Guest Editor

Dear Colleagues,

The study of adenovirus biology is an endless source for discovery in life sciences.

More recently, adenoviruses have become versatile therapeutic platforms: oncolytic agents, replication-defective vaccines, and high-capacity vectors allowing efficient and stable expression of transgenes *in vivo*. This continuous effort requires a deep understanding of adenovirus structure and function.

In this Special Issue, we aim to compile state-of-the-art reviews and research articles on basic aspects of adenovirus, and the applications of this knowledge for the improvement of therapeutic agents. This includes, but is not restricted to: viral entry; intracellular trafficking; replication; encapsidation, genome maintenance in infected cells; host interactions; virus persistence; oncolytic adenoviruses; adenoviral vectors, and adenoviral-based vaccines.

In a moment in which gene therapy achievements and limitations are getting renewed attention, we believe this Special Issue is timely and appropriate. Please consider this opportunity to contribute to the advancement of this exciting field.

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
