Animal Experimental Models in Bone Metabolic Disease

Guest Editor:

Prof. Dr. Jose Luis Pérez-Castrillón
Departments of Internal Medicine and Toxicology, University Hospital Rio Hortega, University of Valladolid, Valladolid, Spain
uvacastrv@gmail.com

Message from the Guest Editor

This Special Issue focuses on animal experimental models used to study the pathogenesis of bone metabolic diseases and will be published in the International Journal of Molecular Sciences (IJMS). We invite researchers to submit original review articles associated with the use of animal experimental models in metabolic bone diseases.

Deadline for manuscript submissions:
closed (10 December 2022)
Message from the Editor-in-Chief

The International Journal of Molecular Sciences (IJMS, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. IJMS publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in IJMS and consider publishing your next paper with us.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry & Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
