Message from the Guest Editors

Dear Colleagues,

Bladder cancer is the most common cancer of the urinary tract. Urine soluble markers should be able to ensure primary diagnosis, follow-up control and screening of high-risk populations. In addition, these markers are designated merely as supporting tools for monitoring bladder cancer patients instead of replacing cystoscopy. The vision of new scientific reports should be illuminated in this Special Issue with focus on “Diagnostic, Prognostic and Predictive Biological Markers in Bladder Cancer”.

We warmly welcome submissions, including original papers and reviews, on this widely-discussed topic.

Associate Prof. Dr. Thorsten Ecke

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
