Deadline for manuscript  
submissions:

**closed (30 June 2019)**

### Message from the Guest Editor

Dear colleagues,

Constantly elevated blood pressure (arterial hypertension) is the most prevalent risk factor for cardiovascular disease, which every year leads to millions of deaths and disability worldwide, especially due to coronary artery disease and stroke. Blood pressure is a paradigmatic example of a complex trait and consequently hypertension is a clear model of multifactorial disease, since many risk factors contribute to its pathogenesis.

This Special Issue will cover at least some of the many “molecular advances in hypertension”, exploring possible influences of genetics and epigenetics components, nutrients, including fatty acids and electrolyte intake, hormonal systems such as the renin angiotensin aldosterone system, the natriuretic peptide network, autonomic nervous system, epoxyeicosatrienoic acids, adipokines, then angiogenic and antiangiogenic factors, and finally the master role of the ageing vascular tree, oxidative stress, the endothelium and the kidney. Even other, less-explored adjuvants of high blood pressure will be included, such as the immune system, the microbiome and the fatty liver.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
