Message from the Guest Editors

Dear Colleagues,

Inflammasomes are intracellular protein complexes comprising intracellular pattern recognition receptors and other inflammatory molecules and play a pivotal role in the inflammatory responses. Inflammasomes are activated in response to a variety of pathogens and danger signals, resulting in caspase-1-dependent maturation and secretion of IL-1 β and IL-18 as well as gsdermin D-mediated pyroptosis, an inflammatory cell death. Previous studies have uncovered the activation of inflammasomes in the inflammatory responses and their dysregulation in many human diseases; therefore, inflammasomes have been considered as critical drug targets to treat a wide range of human diseases.

This Special Issue welcomes original research, reviews, and perspectives with a focus on but not limited to the mechanisms of inflammasome regulation, the role of inflammasome in disease pathogenesis, identification and validation of novel molecules modulating inflammasome activation, development of inflammasome-targeting strategies, and inflammasome-targeted therapeutics.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
