Message from the Guest Editors

Dear Colleagues,

Given its intimate apposition with the environment, the respiratory system provides a robust gateway through which particulates gain access to pulmonary and non-pulmonary tissues. The remarkable worldwide incidence of lung disease and diffuse systemic inflammatory diseases has given rise to novel perspectives that explore etiological overlap in an effort to slow current trends. Accordingly, recent research indicates a growing appreciation for inhaled pollutants that impact organismal health.

We invite authors to contribute original research articles, as well as review articles, that will illustrate and stimulate the blossoming effort to understand the role of inhaled personal (*i.e.*, secondhand smoke) or environmental pollution in diverse disease settings. The accepted papers will highlight to readers the importance of environmental exposures and, thus, potentially provide a new paradigm on the treatment and prevention of related disorders.

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
