submissions:

closed (28 December 2018)

Message from the Guest Editors

Dear Colleagues:

Porous materials are structures with a high specific surface area, narrow pore size distribution and tuneable pore size distribution. These materials have emerged as interesting frameworks for the scientific community due their high potential in various areas, including adsorption, separation, sensing, and catalysis. This Special Issue is aimed to provide a range of original contributions detailing the synthesis, design, characterization and applications in different areas of porous materials (e.g., catalysis, separation, sensing, adsorption, drug delivery, etc). Sincerely invite you to contribute a full research paper or review article for peer-review and possible publication in our special issue.

- Mesoporous materials
- Metal organic frameworks (MOFs)
- Metal oxides
- Zeolites
- Carbon
- Adsorption
- Catalysis
- Catalytic support
- Biomolecules
- Drug delivery

Message from the Editorial Board

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the **Science Citation Index Expanded** (Web of Science), MEDLINE (PubMed), Scopus and other databases.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 15.7 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2019).
