submissions:

closed (28 February 2018)

Message from the Guest Editors

In the field of omics, metabolomics—the large-scale study of metabolites—represents a powerful approach, because metabolites and their levels, unlike other omics measures, directly reflect the underlying global biochemical activity, (patho)physiological conditions and metabolic state of biological systems. In other words, metabolites are closely correlated to phenotype and metabolomics best represents the molecular phenotype of biological systems.

Not least of all, providing metabolome information for food and medicinal plant species is also relevant for better understanding the nutritional and healthy potential of these plants, as well as their adverse effects in human, if any. Metabolite profiling of animal/human body fluids (blood, urine, saliva) after ingestion of plant products will certainly contribute to ascertain their biological/pharmacological properties, toxicological effects, oral bioavailability and, finally, how plant product intake modifies the metabolic profile in animal/human.

With warmest regards,

Prof. Dr. Marcello Iriti
Prof. Dr. Ute Roessner

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
