Deadline for manuscript submissions: closed (31 March 2020)

### Message from the Guest Editor

Dear Colleagues,

Mitochondria are one of the most intriguing intracellular elements. Apart from their great contribution to cellular bioenergetics, they perform various unique functions (both synthetic and regulatory). Inherited or acquired mitochondrial disfunction caused by changes in the genetic, lepidic, and proteinaceous content causing abnormal changes in structure and functions, can be detrimental or even fatal for a cell. The intrinsic mechanism of mitochondrial quality control realizes the detection of unfitted mitochondria or their elements with their elimination from the cell, ultimately performing clearing the system of abnormal mitochondrial structures. However, because of intrinsic and extrinsic challenges, this machinery misses the mitochondrial defects yielding the co-existance of normal and abnormal mitochondria within a single cell, which is a main index of diseases and aging. The goal of the proposed Special Issue, Mitochondria-Targeted Approaches in Health and Disease, is to collect all of the possible methods of intervention into mitochondrial functioning, so as to prevent or repair unwanted changes in the mitochondrial structure and function.

## **Editor-in-Chief**

#### Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
