Deadline for manuscript
submissions:

closed (30 September 2022)

Message from the Guest Editor

Dear Colleague,

The scope of this special issue is to collect papers referring to the molecular profile of gastrointestinal cancer cells. It can be focused on tissue samples or circulating cells, but experimental studies are also welcomed. Histochemical, immunohistochemical, or other molecular techniques used to create a cancer cell profile can also be included. This Special Issue which is guest edited by a professor of pathology might be extended to those clinical studies in which the prognostic or predictive value of biomarkers is checked. Of course, extensive literature reviews and meta-analyses can complete the circle of the molecular profile of cancer cells, which is far from being understood. The submitted papers can be about tumors of the gastrointestinal tract as well as liver, pancreas, and metastatic tumors.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maurizio Battino

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
