Message from the Guest Editors

Dear Colleagues,

Understanding the molecular underpinnings of the pathophysiology of psychiatric disorders remains a challenging task. Nevertheless, the field of molecular psychiatry has greatly benefitted from the rapid technological advancements over the last few years. Significant progress has been made in deciphering the genetic and epigenetic basis of psychiatric disorders at unprecedented resolution. A more comprehensive molecular understanding of psychiatric diseases also is a prerequisite for the rational development of new drugs and treatment strategies.

We encourage submissions addressing the role of molecular, genetic, epigenetic and biochemical mechanisms on all aspects related to pathophysiology, vulnerability and resilience, response to treatment, prognosis, pharmacology and progression of psychiatric disorders.

Message from the Editorial Board

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed by the **Science Citation Index Expanded** (Web of Science), MEDLINE (PubMed), Scopus and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2019).
