

Molecular Diagnosis and Treatment of Skin Cancers

Guest Editors:

Prof. Dr. János Hunyadi

Clinical Center, Department of
Dermatology, The University of
Debrecen, Debrecen, Hungary

Prof. Dr. Liskay Gabriella

Országos Onkológiai Intézet
Budapest, Budapest, Hungary

Deadline for manuscript
submissions:

closed (31 December 2022)

Message from the Guest Editors

Skin cancer is the most common form of cancer, globally accounting for at least 40% of cancer cases. The most common SC type is nonmelanoma skin cancer, occurring in at least 2–3 million people per year. In the past few decades, significant advances have been made in SC screening, staging, treatment, and molecular characterization.

Future treatment will be based on the underlying biology in specific cases of SCs. The genetic and epigenetic instability, as a driving force, results in tumor heterogeneity. It has also become clear that therapeutic interventions can result in selective outgrowth of resistant subtypes. Cure outcome depends on the volume and unique characteristics of the tumor and depends on the competition between treatment efficacy and the outgrowth of escape variants.

In this Special Issue of IJMS, the focus will be on this competition by considering SC's biology about new treatment options.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
