Message from the Guest Editors

Dear Colleagues,

Clinically employed classical cancer therapies can cause unselective damage to healthy tissue. A growing body of research used nanotechnology to find strategies to overcome this disadvantage. Current research is focused on developing innovative therapies based on novel nanoparticles that enhance the therapeutic effect of chemotherapy and radiotherapy in order to reduce toxicity. Typical nanoparticles possess a wide range of physicochemical and biological properties including nanorange size, a large surface area to volume ratio, specific structural properties, the ability to carry specific agents on their surface, the capacity to form stable interactions with ligands, the ability to overcome cellular or tissue barriers and to circulate in the blood for a long time, enhanced electrical conductivity, superparamagnetic behavior, the energy absorption, unique fluorescence properties.

In this Special Issue, we expect contributions from a broad community of scientists working on developing new strategies based on nanoparticles to improve cancer chemotherapy/radiotherapy.

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
