Leone", University of Salerno,
Fisciano, Italy

Deadline for manuscript
submissions:

closed (15 January 2023)

Message from the Guest Editor

Protein misfolding is a mechanism that occurs during the cell life cycle and can be due to a variety of causes, such as protein co- and post-translational modification, oxidative stress, genetic mutations, and thermal stress. As a consequence of misfolding, proteins expose hydrophobic residues that generate protein aggregates that impair the normal cellular activities. The accumulation of misfolded proteins determines the ER stress, leading to activation of the unfolded protein response (UPR).

Protein misfolding and aberrant protein aggregation are currently considered important mechanisms in several degenerative diseases, closely related to ROS production, inflammatory processes and mitochondrial dysfunction.

In this Special Issue we aim to collect new research and reviews to highlight these correlations and provide new information on their relevance for degenerative diseases and possible therapies.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
