Pharmacogenomics 2.0

Guest Editor:

Prof. Dr. Ramón Cacabelos

Euroespes Biomedical Research Center, International Center of Neuroscience and Genomic Medicine, 15165 Corunna, Spain

Deadline for manuscript submissions:

closed (31 December 2022)

Message from the Guest Editor

It is a great pleasure for me to accept the kind invitation of the International Journal of Molecular Sciences to serve as Guest Editor of a Special Issue on "Pharmacogenomics". I think that this is a timely initiative which will be of interest to most medical disciplines. Cardiovascular disorders (25%-30%), cancer (20%-25%) and brain disorders (10%-15%) represent over 60%–70% of morbility and mortality in developed countries. Approximately 10%-20% of direct costs for disease management are attributed pharmacological treatment, and, unfortunately, it is estimated that drug efficacy is restricted to 20%-30% of the cases treated with a particular drug in almost any medical specialty. Many different factors influence drug efficacy and safety, including the chemical properties of a drug, route of administration, disease stage, nutrition, compliance, drugdrug interactions, and pharmacogenomics.

In the coming years, the onset of a revolutionary transformation of protocols and strategies for drug development is expected. Pharmacogenomics is one of the doors through which to enter the complex building of personalized medicine.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
