Deadline for manuscript  
submissions:

**closed (18 December 2018)**

### Message from the Guest Editor

Dear Colleagues,

Advancement in high-throughput “Omics” techniques has revolutionized plant molecular biology research. Proteomics offer one of the best options for the functional analysis of translated regions of the genome and generate much detail information about the intrinsic mechanism of plant stress response. Authors are welcome to submit original research articles and reviews addressing recent advancements, as well as limitations of current proteomic techniques and their diverse applications to get new insights of plant molecular responses to various biotic and abiotic stressors. In addition, bioinformatic techniques are needed for proteomic analysis of plants without genome information. We will also welcome articles about proteomic research, such as meditational plants and so on, which have no genomic information.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
