Heavy Metals Accumulation, Toxicity and Detoxification in Plants

Message from the Guest Editors

In recent years, heavy metals have been widely used in agricultural, chemical, domestic, and technological applications causing environmental and soil contaminations. Heavy metals enter the plant system through soil or via the atmosphere and can accumulate, affecting physiological processes; plant growth; yield; and human health if heavy metals are stored in edible tissues. Understanding the regulation mechanisms of plant heavy metals accumulation and partitioning is important to improve the safety of the food chain.

This Special Issue aims to explore three main issues:

1. The accumulation and partitioning of heavy metals in crops and wild plants;

2. The toxicity and molecular behaviours of cells, tissues, and their effects on physiology and plant growth;

3. Detoxification strategies, plant tolerance, and phytoremediation.
Message from the Editorial Board

The International Journal of Molecular Sciences (IJMS, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. IJMS publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in IJMS and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), MEDLINE (PubMed), Scopus and other databases.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 15.7 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2019).
