

Research of Mitochondrial Function, Structure, Dynamics and Intracellular Organization

Guest Editor:

Dr. Andrey V. Kuznetsov

Department of Heart Surgery,
Medical University Innsbruck,
6020 Innsbruck, Austria

Deadline for manuscript
submissions:

closed (31 January 2022)

Message from the Guest Editor

Mitochondria play a central role in maintaining cellular function by energy (ATP) production. They are also a source of reactive oxygen species and pro-apoptotic elements. In addition to oxidative phosphorylation (OXPHOS), mitochondria regulate a wide range of metabolic processes and cellular signaling mechanisms. The importance of mitochondria in many aspects of cell physiology, bioenergetics, normal cell function and ions control (in particular Ca^{2+}) is well known. Changes in mitochondrial function and energy transfer play crucial role in numerous diseases and in aging. Therefore, multifaceted and comprehensive analysis of mitochondria is central in the studies of energy metabolism and in pathophysiology of human diseases, including ischemia-reperfusion injury, myopathies, neurodegenerative diseases and cancer. The study of mitochondrial oxygen consumption (OXPHOS) can be performed using isolated mitochondria or in situ, in permeabilized cells or muscle fibers. Moreover, changes in the mitochondrial structure, dynamics, organization and function can be analysed by fluorescent imaging approach.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of
Odontostomatologic and
Specialized Clinical Sciences,
Sez-Biochimica, Faculty of
Medicine, Università Politecnica
delle Marche, Via Ranieri 65,

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
