submissions:

closed (30 November 2017)

Message from the Guest Editors

Dear Colleagues,

Retinal diseases have a devastating impact on millions of people worldwide. The range of disorders affecting the retina is large and includes age-related macular degeneration, diabetic retinopathy, and optic neuropathies. The costs associated with retinal disorders, both in terms of resources required for healthcare, and the toll that they exact on patients and their families, are steep, and there is an urgent need for new therapeutic approaches. The last few decades have brought a great deal of progress in terms of mechanisms and drugs, but translating these discoveries into therapies remains a critical challenge for the most of retinal diseases. This special issue explores the latest developments in the evolving field of retinal diseases trying to bridge the gap between basic research discoveries and clinical applications. Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
