Message from the Guest Editors

Dear Colleagues,

We are launching a Special Issue focusing on muscle cell contractility. Indeed, one very important function of muscle cells is producing a force sufficient to allow for contraction. Such contraction requires the coordinated action of well-structured proteins named sarcomeric proteins.

As the exact function of these sarcomeric proteins (and how they interact with neighbouring molecules) to allow for muscle cell contraction is only partially known, we seek original research papers and review articles on this topic. We also hope to receive articles that better explain how these sarcomeric proteins can be dysfunctional in the context of muscle diseases.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
