2. Centre for Research on Green Sustainable Chemistry, Tottori University, Koyama-Minami 4-101, Tottori 680-8552, Japan

Deadline for manuscript submissions:

closed (31 March 2021)

Message from the Guest Editor

Self-assembly of rational designed peptides and peptide-protein conjugates enables the development of various bio-nanomaterials such as nanofibers, nanotubes, nanocapsules, and composite materials. Understanding the assembly/disassembly mechanism of the peptide/protein-based nanomaterials is important issue for the applications to drug carriers and scaffolds of cells. This special issue explores recent progress about self-assembly mechanism of peptides and peptide-protein conjugates used recent analytical methods such as microscopy, thermodynamic, and kinetic analyses

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
