Oxidative Stress and Damage in the Space Environment: Physiological Ground and Flight Parallels

Message from the Guest Editors

Dear Colleagues,

Technological advances now allow the planning of deep space exploration missions with the aim to discover new habitats for humankind. Exciting work from a multitude of investigators across the US, Canada, Europe, and Japan have identified oxidative damage as a key risk factor to major organs and systems physiologies that could pose a threat to the health of the astronauts and the success of the mission. This Special Issue of *IJMS* is dedicated to providing a comprehensive overview of the identified risks in space flight and habitation and will focus on ground based vs. flight comparisons of how oxidative stress when exposed to space-relevant conditions such as cosmic/galactic radiation, solar particle events, hypogravity (G-variations and partial gravity) and hypoxia/hyperoxia or any aggregate combination of stressors effects the human physiology.

Prof. Dr. Melpo Christofidou-Solomidou

Message from the Editorial Board

The International Journal of Molecular Sciences (IJMS, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. IJMS publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in IJMS and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), MEDLINE (PubMed), Scopus and other databases.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 15.7 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2019).
