Message from the Guest Editors

Dear Colleagues,

Nature employs a combination of supramolecular interactions (e.g., electrostatic, hydrophobic, π-π, cation/anion-π, van der Waals forces, hydrogen-bonding and metal coordination) to generate hierarchically ordered structures with remarkable stimuli-responsive properties. The same structure-directing forces can, in principle, be employed for the realization of man-made assemblies with similar or perhaps even greater utility. In this Special Issue of the International Journal of Molecular Sciences devoted to "Supramolecular Interactions", we warmly invite submissions related to the synthesis, characterization and technical/biomedical applications of supramolecular entities.

Dr. John George Hardy

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (IJMS, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. IJMS publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in IJMS and consider publishing your next paper with us.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and many other databases.

Journal Rank: JCR - Q1 (Biochemistry & Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
