Deadline for manuscript  
submissions:

**closed (31 December 2022)**

### Message from the Guest Editor

It is estimated that at least 10 % of worldwide cancers may be attributable to viral infection with a strong impact on survival and quality of life. Oncogenic viruses include various classes of DNA and RNA viruses. The viruses associated with the greatest number of cancer cases are the human papillomaviruses (HPVs), which cause cervical cancer and several other epithelial malignancies, and Hepatitis B virus (HBV) and hepatitis C virus (HCV), which are responsible for the majority of hepatocellular cancer. Other oncoviruses include Epstein–Barr virus (EBV), human T-cell leukemia virus (HTLV-I), Kaposi's sarcoma-associated herpes virus (KSHV), and Merkel cell polyomavirus (MCV).

In this Special Issue, we welcome submissions of research and review articles on the molecular mechanisms that contribute to virus-induced carcinogenesis, including papers on the role of oncoviral proteins in cell transformation, the gene mutational profile of viral and host genomes, expression levels of miRNAs, gene methylation, immune responses, and new therapeutic opportunities (including cancer vaccines for viruses-related cancers).

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
